

Mutual News

Third Quarter, 2023

Stay Informed with the Provider Manual

The Provider Manual is available at MedMutual.com/Provider > Provider Manual. It is updated quarterly to include the latest policies, procedures and guidelines providers need to work effectively with Medical Mutual.

Sub-sections Revised — Current updates to the Provider Manual include:

- Section 6 Adjustment and Provider Inquiries Overview:
 The following sections were revised:
 - Provider Website Resources subsection of Provider Inquiries section

Contact Us

The phone number for our Medical Mutual Provider Contracting team is now 1-800-625-2583. This number is being used in all of our provider contracting regions.

If you do not know who your Provider Contracting Representative is, you can find the information on the contact us page of MedMutual.com/Provider.

General Information

Reimbursement Policy

Effective Nov. 1, 2023, Medical Mutual is implementing the PO and PN Modifiers Reimbursement Policy (Policy Number RP-202305).

To view this policy, please visit MedMutual.com/Provider and select Policies and Standards > Reimbursement Policies.

Important HEDIS Measure and Best Practices for Children and Adolescents on Antipsychotic Medications

Medical Mutual values the care you provide for our members. We are always looking for ways to work with you to improve the health of our members, including children and adolescents on antipsychotic medications.

The following Healthcare Effectiveness Data and Information Set (HEDIS®) measure, along with best practices and CPT® codes, is related to child and adolescent antipsychotic medication use.

APM (Metabolic Monitoring for Children and Adolescents on Antipsychotics)

This measure evaluates the percentage of children and adolescents 1–17 years of age who had two or more antipsychotic prescriptions and who had annual metabolic testing performed. Three rates are reported:

- 1. The percentage of children and adolescents on antipsychotics who received blood glucose testing.
- 2. The percentage of children and adolescents on antipsychotics who received cholesterol testing.
- 3. The percentage of children and adolescents on antipsychotics who received blood glucose and cholesterol testing.

The APM measure does not apply to members in hospice.

Best Practices

- Complete a past family medical history to evaluate for any conditions that could raise the risk of complications from antipsychotic medications (e.g., tardive dyskinesia, diabetes, hypercholesterolemia, and cataracts).
- Assess health complications such as weight gain and diabetes, which can lead to serious metabolic health complications due to medication usage.
- Obtain a baseline and annual body mass index.
- Monitor renal and liver function as these drugs are metabolized through the kidneys and liver.
 Annual monitoring of at least one test for blood glucose or HbA1c, and one test for cholesterol.
- Before starting an antipsychotic medication, perform an Abnormal Involuntary Movement Scale to assess patients for tardive dyskinesia and monitor every 6 months both during medication use and while tapering doses.
- When prescribing antipsychotics, consider "start low and go slow" to find the most effective dosage for the patient and reduce unnecessary side effects.
- Taper antipsychotic medications when stopping as it may cause a relapse.
- Educate the patient and caregivers about common side effects such as increased blood pressure, changes in weight, anxiety, agitation, and insomnia.

Coding Instructions

Use CPT® codes to close care gaps.

- Cholesterol Lab Test Codes
 - CPT: 80061, 82465, 83700, 83701, 83704, 83718, 83721, 83722, 84478
 - CPT-II: 3048F, 3049F, 3050F
- Glucose Lab Test Codes
 - CPT: 80047, 80048, 80050, 80053, 80069, 82947, 82950, 82951
- HbA1c Lab Test Codes
 - CPT: 83036, 83037
 - CPT-II: 3044F, 3046F, 3051F, 3052F

Codes and results can be accepted as supplemental data. Contact your Medical Mutual provider representative to discuss data exchange opportunities.

Primary Care Providers (PCPs)

PCPs can help our members by:

- Establishing a baseline and monitoring blood glucose and cholesterol levels every year to manage side effects.
- Testing blood glucose and cholesterol at a member's annual checkup or school physical to reduce additional visits.
- Encouraging shared decision-making by educating members and caregivers about the:
 - Increased risk of metabolic health complications from antipsychotic medications
 - Importance of screening blood glucose and cholesterol levels

Behavioral Health Providers

Behavioral health providers can help our members by:

- Ordering blood glucose and cholesterol screening tests for members who do not have regular contact with their PCP.
- Ordering blood glucose and cholesterol screening tests within 1 month of changing a member's medication.

Behavioral Health Resources

- Behavioral Health Case Management To connect with a Medical Mutual behavioral health case manager, email BehavioralHealthDepartment@MedMutual.com or call 1-800-258-3175 (TTY:711).
- SonderMind® SonderMind offers an online library of information about mental and behavioral health. They can also connect members with a local therapist for an in-person or online appointment. Call 1-844-256-9897
 (TTY: 711) M-F from 9 a.m. 8 p.m. E.T. to schedule an appointment or learn more.
- Medical Mutual Coordination of Care Forms www.medmutual.com/For-Providers/Continuity-and-Coordination-of-Care.aspx.

Earn Continuing Education (CE) Credits: Incorporating Antibiotic Stewardship in Your Practice

The Centers for Disease Control and Prevention (CDC) estimates approximately 47 million courses of antibiotics are prescribed unnecessarily each year.¹

Two important measures monitored by the National Committee for Quality Assurance (NCQA) related to antibiotic use are:

- Appropriate Treatment for Upper Respiratory Infections (URI)
- Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis (AAB)

Antibiotic stewardship, the effort to measure and improve how antibiotics are prescribed, can help you stay diligent and ensure appropriate antibiotic use with your patients.

Earning CE Credits

To help with this effort, the CDC is offering an online training course on antibiotic stewardship available at www.cdc.gov/antibiotic-use/training/continuing-education.html. The course includes multiple modules with free continuing education (CE) credits that can be taken in any order.

Course objectives:

- Describing the role of the healthcare team in antibiotic stewardship
- Updating healthcare professionals on current antimicrobial resistance threats
- Encouraging open discussion among physicians and patients about appropriate antibiotic prescribing

If you need help starting an antibiotic stewardship program, or are looking to assess if your current program is working, here are some tools from the CDC you can use.

- The Core Elements of Hospital Antibiotic Stewardship Programs www.cdc.gov/antibiotic-use/healthcare/pdfs/assessment-tool-Ppdf
- The Core Elements of Outpatient Antibiotic Stewardship <u>www.cdc.gov/antibiotic-use/community/</u> pdfs/16_268900-A_CoreElementsOutpatient_check_1_508.pdf

References and Resources

These recommendations are informational only. They are not intended to require a specific course of treatment or take the place of professional medical advice, diagnosis or treatment. Members should make decisions about care with their healthcare providers. Recommended treatment or services may not be covered. Eligibility and coverage depend on the member's specific benefit plan.

Pharmacy Prior Approval Requirements

Medical Mutual requires prior approval for the following drugs regardless of whether they are covered under the medical or pharmacy benefits:

- All new specialty drugs
- All new drugs with significant safety, clinical or potential abuse or diversion concerns

This requirement is intended to ensure medications are used safely and will be effective for members. The prior approval criteria for these drugs are detailed in the Global PA/New Drug Prior Approval policy available at Medmutual.com/Provider on the following pages:

For drugs covered under the medical benefit: Select Policies and Standards > Corporate Medical Policies.

This page also includes all current Corporate Medical Policies and information about our prior approval services and Magellan Rx's secure provider portal, a web-based tool at www1.magellanrx.com that providers can use to manage prior approval requests for medications.

For drugs covered under the pharmacy benefit: Select Policies and Standards > Prescription Drug Resources, then click the link under <u>Prior Authorization</u> to see the list. This page also includes information about our other coverage management programs (e.g., step therapy, quantity limits) and formularies, as well as a link to the ExpressPAth tool.
